

### A brief introduction to the GIZ Training Kit

Representatives from different sectors exploring the 13 HLPE principles

Discussion on barriers and possible solutions at different levels

### Why the training?

- ✓ Developed in the context of German Development Cooperation
- ✓ Purpose: Enhancing capacities for agroecological transition (in house and in partner countries)
- ✓ Participants: Everyone who is working in rural development, agriculture, nutrition, or food systems and who is interested in introducing agroecological approaches into their current projects

# What 's inside the training package?

### **Training Approach**

- Harvard Case Methodology
- Adult-learning & interactive pedagogy

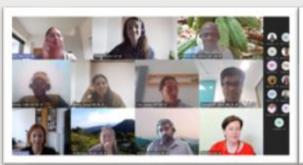

#### **Learning Flow & Tools**

- Real or fictitious case work
- Theoretical inputs & practical exercises
- Hands-on tools (ACT, mainstreaming continuum, message box)

#### **Delivery Formats**

- Face-to-face workshops
- Fully online courses
- Hybrid/blended formats

Field visit

Applying the agroecology lense

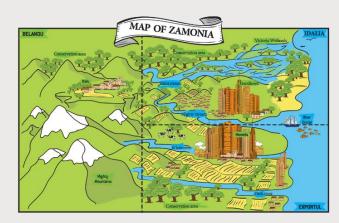

**Silent discussion** 

Solving team challenges

**Group work** 

Online training

## The training kit

Zamonia – ficticious country and scenario for successful agroecological transition

#### Material is available in: English, French, Spanish

The training material is published with a CC BY-NC-SA 4.0 (Attribution-NonCommercial-ShareAlike). This mean the materials are meant to be used for non-for-profit purposes. The modular structure and copyright license enable you to use and adapt the material, so it best fits your context and your learning needs.

**Reader:** The theoretical foundation of the training and interesting read and summary on agroecology.

912

**Exercise book:** A selection of exercises and interactive training methods for designing the training.

**Case Work**: An optional case work enables the participants to dive into the understanding of agroecology and try the methods and tools within a fictional case.

**Guidebook for trainers:** For those who want to design a training for their context, this guidebook offers some more details and info on how to use the material and how to design a context specific adaptation.

### How you can use it

### In your next workshop/course

- Mix & match modules to fit timing, audience & objectives
- ✓ Use tools such as ACT or the mainstreaming continuum

### Include real-world examples

> E.g. Deep dives with peer-exchange formats
